General Power Tool Safety Warnings

WARNING: Read all safety warnings and all instructions.

Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Save all warning and instructions for future reference.

The term “power tool” in the warnings refers to your mains operated (corded) power tool.

1) Work area safety

a) This product is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning the use of the product by a person responsible for their safety. Children should be supervised to ensure that they do not play with the product. Local regulations may restrict the age of the operator. Never allow children or people unfamiliar with these instructions to use the product. Power tools are dangerous in the hands of untrained users.

b) Never operate the product while people, especially children, or pets are nearby. Distractions can cause you to lose control.

c) Never blow debris in the direction of bystanders. The operator or user is responsible for accidents or hazards occurring to other people or their property.

d) Keep work area clean and well lit. Cluttered or dark areas invite accidents.

e) Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.

2) Electrical safety

a) Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adaptor plugs with earthed (grounded) power tools. Use only on AC mains supply voltage shown on the product rating label. Unmodified plugs and matching outlets will reduce risk of electric shock.

b) Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.

c) Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk electric shock.

d) Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Before use, examine cord for damage. Replace cord if there are signs of damage or ageing. Do not use the product if the cord is damaged or worn. Immediately disconnect from the mains electricity supply if the cord is cut, or the insulation is damaged. Do not touch the electric cord until the electrical supply has been disconnected. Do not repair a cut or damaged cord. Replace it with a new one. Damaged or entangled cords increase the risk of electric shock.

e) The electric cord must be uncoiled. Coiled cord can overheat and reduce the efficiency of the product. Always wind cord carefully, avoiding kinks.

f) When operating a power tool outdoors, use an extension cord suitable for outdoor use fitted with a coupler according to IEC 60320-2-3. Use of a cord suitable for outdoor use reduces the risk of electric shock.

g) If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply with a tripping current of not more than 30 mA. Even with a RCD installed, 100% safety cannot be guaranteed and safe working practices must be followed at all times. Check your RCD every time you use your product. Use of an RCD reduces the risk of electric shock.

3) Personal safety

a) Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while

operating power tools may result in serious personal injury.

b) Use personal protective equipment. Always wear eye protection and hearing protection. To prevent dust irritation, the use of a dust mask is recommended.

Protective equipment such as eye protection, hearing protection, dust mask, nonskid safety shoes, or hard hat used for appropriate conditions will reduce personal injuries.

c) Prevent unintentional starting. Ensure the switch is in the off position before connecting to power source, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.

d) Do not overreach. Keep proper footing and balance at all times. On slopes, be extra careful and wear non-slip footwear. Do not walk backwards while operating your product. Walk, never run. Do not use ladders while operating the product. This enables better control of the power tool in unexpected situations.

e) Dress properly. Always wear suitable clothing, gloves, and stout shoes. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewellery or long hair can be caught in moving parts.

4) Power tool use and care

a) Only use the product in the manner and for the functions described in these instructions. Always direct the cord to the rear, away from the product. Do not force the power tool. Use the correct power tool for your application.
The correct power tool will do the job better and safer at the rate for which it was designed.

b) Always make sure your product is in a safe operating condition before use. Do not use the power tool if the switch does not turn it on and off. Know how to stop the product quickly in an emergency. Any power tool that cannot be controlled with the switch is dangerous and must be repaired.

c) The impeller continues to rotate after your product has been switched off.
The motor must be stopped and the impeller blade no longer turning to avoid serious injury from the rotating blades.

d) Disconnect the plug from the power source:
– before removing or replacing fully assembled debris bag;
– before leaving the product unattended for any period;
– before clearing a blockage;

- before checking, cleaning or working on the appliance;
- if the product starts to vibrate abnormally. Check immediately. Excessive vibration can cause injury.
- before passing to another person.

e) Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool. Power tools are dangerous in the hands of untrained users.

f) Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use. Keep all cooling air inlets clear of debris.

Many accidents are caused by poorly maintained power tools.

g) Use the power tool and accessories in accordance with these instructions, taking into account the working conditions and the work to be performed. Use the product only in daylight or good artificial light. Use of the power tool for operations different from those intended could result in a hazardous situation.

5) Maintenance and storage

Have your power tool serviced by a qualified repair person using only identical replacement parts.

This will ensure that the safety of the power tool is maintained.

- Keep all nuts, bolts and screws tight to be sure the product is in a safe working condition.
- Replace worn or damaged parts for safety.
- Use only genuine replacement parts and accessories.
- Inspect the debris bag regularly. If the debris bag becomes worn or damaged, replace.
- Store in a cool dry place and out of reach of children. Do not store outdoors.

Blower safety warnings

- **Inspect the area before using the unit.**
Remove all debris and hard objects such as rocks, glass, wire, etc., that can ricochet, be thrown, or otherwise cause injury or damage during operation.
- **Never run the unit without the proper equipment attached. When used as a blower, always install a blower tube. Use only recommended attachments to prevent personal injury.**
- **Do not use blower near leaf or brush fires, fireplaces, barbecue pits, ashtrays, etc.**
Proper use of the blower will help avoid spreading fire.

- **Never place objects inside the blower tubes; always direct the blowing debris away from people, animals, glass, and solid objects such as trees, automobiles, walls, etc.** *The force of air can cause rocks, dirt, or sticks to be thrown or to ricochet which can hurt people or animals, break glass, or cause other damage.*
- **Never use for spreading chemicals, fertilizers, or any other substances.** *This will prevent the spreading of toxic materials.*

Vacuum safety warnings

- **Stop the motor and disconnect the extension cord before opening the air inlet door or attempting to insert or remove the vacuum tubes.** *The motor must be stopped and the impeller blades no longer turning to avoid serious injury from the rotating blades.*
- **Inspect the area before using the unit.** *Hard objects can be thrown through the collection bag or the housing and become dangerous missiles which can cause serious injury to the operator or others.*
- **Do not vacuum stones, gravel, metal, broken glass, etc.** *Proper use of the unit will reduce possible personal injury and/or damage to the unit.*
- **Do not attempt to vacuum water or other liquids.** *Water or other liquids entering a power tool will increase the risk of electric shock.*
- **Never run the unit without the proper equipment attached.** *When used as a vacuum, always install vacuum tubes and collection bag assembly.* *Make sure the collection bag*

assembly is completely zipped when unit is running to avoid flying debris. Use only recommended attachments.

- **Do not vacuum discarded matches, cigars, cigarettes, or ash from fireplaces, barbecue pits, brush piles, etc.** *Avoid situations which could set the collection bag on fire. To avoid spreading fire, do not use blower near leaf or brush fires, fireplaces, barbecue pits, ashtrays, etc.*
- **Always use the shoulder strap when vacuuming.** *This will help maintain control of the power tool.*
- **Check air intake openings, elbow tube, and vacuum tubes frequently, always with the unit stopped and the power source disconnected.** *Keep vents and tubes free of debris which can accumulate and restrict proper air flow. Do not use with any opening blocked. Keep free of dust, lint, hair and anything that may reduce air flow.*

Additional Safety Recommendations

Danger! Small parts could be swallowed during assembly and there is a risk of suffocation from the polybag. Keep infants away during assembly.

Warning! This machine produces an electro-magnetical field during operation. This field may under some circumstances interfere with active or passive medical implants. To reduce the risk of serious or fatal injury, we recommend persons with medical implants to consult their physician and the medical implant manufacturer before operating this machine.

2. Assembly

WARNING: Stop the unit and unplug the extension cord before opening the inlet cover or attempting to install or remove the blower tube or vacuum tubes. *The motor must be stopped and the impeller blades no longer turning to avoid serious injury from the rotating blades.*

3. Operation

WARNING: Do not use the unit without the tubes or collection bag properly attached to avoid flying debris and/or impeller contact which can cause serious injury. Always wear gloves and use eye protection to prevent rocks or debris from being blown or ricocheting into the eyes and face which can result in blindness or serious injury.

Cables:

Use only 1.00mm² size cable up to 40 metres length maximum.

Maximum rating:

1.00mm² size cable

ErgoJet 3000 (EJ3000): 3000 W

ErgoJet 2500 (EJ2500): 2500 W

Mains cables and extensions are available from your local approved service centre. Only use extension cables specifically designed for outdoor use.

Connecting the unit:

WARNING! To avoid damage to the plug, the extension cable must be inserted into the cable lock.

1. First make a loop with the extension cable (12), thread the loop into the cable lock (13) and pull the extension cable tight.
2. Connect the unit's plug to the extension cable.
3. Connect the extension cable to a 230-V mains socket.

Starting the unit:

To start:

→ Move the ON/OFF switch (14) to the **ON** position.

The unit starts.

NOTE: For ErgoJet 3000 (EJ 3000) only: The motor speed can be increased or decreased by using the variable speed control (15).

CAUTION: To avoid causing damage to the unit, only use the variable speed control in blow mode. DO NOT attempt to use the variable speed control in vacuum mode. Lower speeds during vacuum use could allow debris to build up, stall the motor and cause unit failure.

To stop:

→ Move the ON/OFF switch (14) to the **OFF** position.

The unit stops.

Working positions:

Blow mode

Use your unit as a blower for sweeping debris or grass clippings from driveways, sidewalks, patios, etc. Also, for blowing grass clippings, straw, or leaves into piles, or removing debris from corners, around joints, or between bricks.

For ErgoJet 3000 (EJ 3000) only:

Use the variable speed control to increase or decrease the motor speed during blower use.

Direct air flow by directing the blower tube down or to one side.

Always work away from solid objects such as walks, large stones, vehicles, and fences.

Clean corners by starting in corners and moving outward. This will help prevent an accumulation of debris which could fly into your face. Be careful when working near plants. The force of the air could damage tender plants.

Vacuum mode

Use your unit as a vacuum to pick up dry material such as leaves, grass, small twigs, and bits of paper.

For best results during vacuum use, operate your unit at high speed.

Move slowly back and forth over the material as you vacuum. Avoid forcing the unit into a pile of debris as this can clog the unit.

Keep the vacuum tube about an inch above the ground for best results.

WARNING: If the unit becomes clogged, stop the unit and unplug the extension cord. Wait until the impeller has completely stopped turning, then remove the vacuum tubes. Carefully reach into the vacuum opening and clear out the clogged debris.

This will reduce possible personal injury from the impeller.

4. Storage

Storage:

Store unit unplugged, well out of the reach of children.

1. Stop unit and disconnect from the mains electricity supply.
2. Allow motor to cool before storing or transporting.
3. Store unit with all guards in place. Position unit so that any sharp object cannot accidentally cause injury.

Extended storage:

Prepare unit for storage at the end of the season or if it will not be used for 30 days or more.

If your blower is to be stored for a period of time:

1. Stop unit and disconnect from the mains electricity supply.
2. Clean the entire unit before lengthy storage.
3. Open inlet cover and clean any dirt, grass, or debris that has collected. Inspect the blower and all tubes.
Close and make sure the cover is latched.
4. Use a soft brush to clean air vents and air inlet of debris.
Do not use water.
5. Store your unit and extension cord in a well ventilated area and covered, if possible, to prevent dust and dirt accumulation.
Do not cover with plastic. Plastic cannot breathe and may cause condensation and eventual rust or corrosion.
6. Check entire unit for loose screws.
Replace any damaged, worn, or broken parts.
7. Remove tube(s) for easier storage.

Disposal:

(in accordance with
EU-directive RL 2012/19/EU)

This product must not be added to normal household waste.
It must be disposed of in line with local environmental regulations.

5. Maintenance

WARNING: Stop the unit and disconnect the plug from the power source before making any adjustments, changing accessories, or performing maintenance.

Such preventive safety measures reduce the risk of starting the power tool accidentally.

- Wash the bag once a year. Remove the bag from the blower and turn the bag inside out. Wash the bag with a water hose. Allow the bag to hang and dry completely before you reuse the bag.

WARNING: If the unit becomes clogged, stop the unit and unplug the extension cord. Wait until the impeller has completely stopped turning, then remove the vacuum tubes. Carefully reach into the vacuum opening and clear out the clogged debris.

This will reduce possible personal injury from the impeller.

Removing an object from the air intake:

1. Remove the vacuum tubes.
2. Carefully reach into the vacuum opening and clear out the air intake area. Clear all debris from impeller.
