

## How to assemble your Hippiie Tipi.

It is not difficult to assemble a Hippiie Tipi - However, it is important that it is done correctly - please follow the instructions carefully.

In the bag with the tepee canvas, you will also find a small sheet of stickers numbered 1-5, a cotton string and two wooden beads.

Start by placing a sticker on each pole just above the drilled hole. The pole with 2 holes should be marked with number '2'.

Place the poles in the channels inside the tepee. Start by placing pole no. 1 in the channel to the right of the zipper (next to the roommate logo).

Then place pole no 2 in the next channel to the right and so on. Continue to all 5 poles are in place.

To keep the canvas in place fastened the ribbon attached to the canvas by running it through the bottom hole in the pole with two drilled holes. Then tie a bow.

Run the loose string through all the holes in the right order 1-2-3-4-5. Then tighten the string and tie a knot. Place one wooden bead on the end of each loose string and tie a knot.

Remove the stickers.

The Hippiie Tipi is ready for use.

Enjoy!
