give *light* to *life*

## HOW DOES IT WORK?

### COLOURED LED LIGHT

A specially developed LED light by elho and bulb to ensure healthy growth of indoor plants. The light colour mix is made of carefully selected frequencies to provide the best light conditions.

**DAY AND NIGHT AUTOMATIC CYCLE**  
Just plug the adaptor into the socket and the built-in timer makes sure your plants will get a healthy dose of indoor sunlight for 15 hours a day.

**LOW ENERGY CONSUMPTION**  
The light is made of a highly efficient LED and consumes 2.6W only.

**TELESCOPIC STICK**  
The lamp fits with medium and big indoor plants. The stick is extendable from 28-94cm.

**EASY USE**  
Just plug the adaptor into the socket and your plant will be happy.

**NEW**

**TEMPERATURE**  
Plants suffer both from very cold and very hot environments. Exactly like you! Try to keep your plants at the most regular temperature possible (min 15°C / max 25°C).

**COLD LIGHT**  
The Leaf Light Care emits a cold light, so you don't need to worry about the leaves; they won't burn!

Big plants might need more light.  
Place two Leaf Light Care to spread the light more equally.

## HOW TO INSTALL?

### INSTRUCTIONS

1. Mount the lamp onto the metal stick.
2. Extend the stick so its height suits your plant. Place the lampshade no further than 10cm from the highest leaves of the plant.
3. In order for the Leaf Light Care to be stable in the flowerpot, place the stick approximately 10cm into the soil.
4. Attach the wire to the stick using the clamps.
5. Plug the adaptor into the socket.

\* Choose a flowerpot that is at least 15-20cm deep.
